

Microsoft 365 Security Assessment

Identify hidden risks, streamline compliance, and strengthen audit readiness — without the overhead.

Why Microsoft 365 Security Assessment?

Independent Oversight. Trusted Insight.

Microsoft 365 is essential to modern business — but misconfigurations, excessive access, and unchecked sharing can quietly expose risk. CyberStash's Microsoft 365 Security Assessment delivers expert-led review and actionable reporting across your tenant's security and compliance posture.

Our Approach

- **Validated by Experts** – Human-led analysis, not just raw reporting
- **Context-Aware** – Risk scoring aligned to impact and environment
- **Compliance Readiness Support** – Helps meet common audit and control expectations
- **Hands-Off Delivery** – No agents or disruption to your operations

Key Benefits

- **Risk-Based Findings** – Focus on what matters, not noise
- **Faster Audit Readiness** – Mapped controls and evidence in hand
- **Improved Posture** – Identify misconfigurations and exposure
- **Trusted Reporting** – Clear, board-ready output that drives action

Value & Outcomes

- **Independent Assurance** – Unbiased, third-party validation of your Microsoft 365 security posture
- **Reduced Risk of Breach** – Identify and address risky access, configuration gaps, and legacy exposure
- **Governance Visibility** – Help IT, security, and compliance leaders understand and manage tenant risk
- **Compliance Readiness Support** – Evidenced insight to support ISO 27001, Essential Eight, and audit reviews
- **Optimised Access Control** – Spot excessive privileges and overly broad sharing across users and apps
- **External Sharing Oversight** – Identify links, guests, and shared content that may violate policy
- **License Usage Insight** – See underutilised or misaligned license assignments
- **Configuration Hardening** – Validate baseline policies like MFA, session control, and conditional access
- **Visibility Across Workloads** – Coverage includes Teams, SharePoint, OneDrive, Exchange, Entra ID, and more.

Expert-Led Assessment

Delivered by Microsoft 365 security experts — not just automated scans or generic templates.

Actionable Reporting

Risk-prioritised findings with remediation steps and audit-ready reporting — delivered within 1–2 weeks.

Zero Disruption Delivery

Read-only data access with no agents — conducted securely without user or workflow interruption.

Protect your business with confidence.
