

Security Health Check

Know Your Security Posture.
Strengthen Your Defence.

Why Perform a Security Health Check?

When every gap matters, knowledge is power.

CyberStash's Security Health Check gives you a fast, expert-led assessment of your cyber posture — identifying weaknesses, validating defences, and showing exactly where to focus next.

Get clarity, confidence, and control — in a single report.

Our Approach

- **Right-Sized Assessment** – Tailored to your business scale: two days for small teams, five for mid-size organisations, and up to three weeks for large enterprises.
- **Evidence-Based Scoring** – Benchmark your defences against frameworks like the ACSC Essential Eight and ISO 27001.
- **Practical Roadmap** – Receive clear, prioritised actions to strengthen your security posture.

Value & Outcomes

- **Faster Remediation** – Prioritised fixes that deliver immediate protection.
- **Operational Assurance** – Benchmark your maturity against peers and standards.
- **Strategic Insight** – Equip leadership with clear, evidence-based visibility of risk.

Key Benefits

- **Immediate Insight** – Understand your cyber posture in days, not months.
- **Reduced Risk** – Close exploitable gaps before they become incidents.
- **Audit Readiness** – Map controls and show measurable results.
- **Informed Investment** – Direct budgets toward the controls that move risk the most.

From Question to Clarity

- Every Health Check translates raw data into actionable guidance your IT or leadership team can trust.
- Clear, visual reports — built for decision-making; no jargon.
- Leave knowing exactly where you stand — and what to do next.

Stay informed. Stay secure. Stay ahead.

Small Business

2-day Assessment

Medium Business

5-day Assessment

Large Enterprise

3-week Assessment

Protect your business with confidence.
