

# Security Framework & Certification Readiness

**Build Strong Frameworks. Pass Audits. Stay Compliant.**

CyberStash helps organisations design, strengthen, and maintain security frameworks aligned to recognised standards such as ISO 27001, NIST CSF, SOC 2, and the Essential Eight.

We guide you from assessment through remediation and audit preparation — turning complex requirements into clear, achievable actions.

## What We Deliver

### - Framework & ISMS Design

We design and implement a practical Information Security Management System aligned to your chosen framework.

### - Gap Assessment & Roadmap

We assess your current posture, identify gaps, and define a clear, prioritised remediation plan.

### - Audit Preparation & Support

*We prepare your teams, documentation, and evidence for a smooth, successful audit.*

### - Independent Assurance Reviews

We validate control design and effectiveness before certification or customer assurance activities.

### - Ongoing Compliance Support

We provide continuous guidance to maintain compliance and stay prepared for future audits.

## What This Means for You

### - Clear Direction

Know what's required and how to get there.

### - Lower Audit Risk

Enter audits prepared — not scrambling at the last minute.

### - Stronger Governance

Establish clear ownership and accountable security practices.

### - Sustained Compliance

Stay aligned year after year with structured expert support.

## Our Promise

### - Clear Timelines

Defined phases and milestones so you always know what comes next.

### - Predictable Cost

Transparent pricing aligned to your framework goals and scope.

### - Practical Outcomes

Controls designed to work in the real world — not just for audits.

### - Quality Delivery

Expert-led execution with minimal disruption to your business.

### Readiness

We prepare your organisation for certification success.

### Certification

We guide you through audits with confidence.

### Compliance

We keep you aligned with your framework year after year.

Protect your business with confidence.

**Start your certification journey today!**
